Picked up on a whim because sci-fi plus dragons sounded fun to spend a few hours on.

But, I was not prepared for the levels of depth and complexity presented in this game. Just pick it up if it even remotely interests you, doesn't matter if it doesn't seem like your thing. The levels this game goes through to get invested in the characters and story are just too powerful to be ignored.

Still not convinced? I've never wanted to finish a game more than once after getting the "good ending," but here it just has to be done. Couldn't recommend a game more if you don't mind reading and maybe a few tears.

(Ouch, mods also help as a bandaid after finishing and getting the final ending. You are expected to play the game more than once!) . i can't say no to this game, every time i see it in my library i have to force myself to not play it, it took my soul and my love also it's soo much emotion. 10/10 would always play and find new ways to make it different, i don't want the game to die for me because it's a very special game.

also not a furry.
